

Nitto double-coated tape 500S consists of a non-woven tissue carrier, coated with a pressure sensitive acrylic adhesive.

Used for a wide variety of mounting applications.

Features

- Multi purpose
- Good workability
- Good adhesion on several substrates
- Good ageing properties
- High temperature resistance
- RoHS compliant

Properties

Adhesive type	Pressure sensitive modified acrylic adhesive
Tape thickness	0,160 mm
Release liner	Siliconised white PE coated paper
Carrier type	Non-woven tissue
Adhesion value	1200 cN/20mm
Release value	35 cN/50mm
Static shear	1 mm/3h

Nitto double-coated tape 500(S) is a multi-purpose tape designed for bonding nameplates, metal sheets, plastic plates, foam materials and molds, mainly used in electrical appliances, automotive, office automation equipment and consumer electronics devices.
